

Social Work 501: Poverty and Inequality
Fall 2007

Jennifer Romich

romich@u.washington.edu Phone: 206/616-6121

Office: SSW 225 K, office hours by appointment

Course Description

This course is a critical analysis of poverty and inequality in the US and internationally, with an analytic and descriptive focus on measurement, processes of production and perpetuation, and public policy responses. It examines competing perspectives on the causes of poverty, the role of policy, and socioeconomic dimensions of stratification, including race, ethnicity, class, gender, immigration status, disability, age, sexual orientation and family structure.

This course builds upon historical and critical analysis content covered in the "Intellectual and Historical Foundations of Professional Social Work Practice" and links to policy advocacy and policy analysis material covered in policy practice sessions in the "Macro practice" sequence. Together, these courses offer a foundation in the historical, political, economic, and philosophical context of US social welfare policy, familiarize students with current policy controversies, build skills in policy analysis and advocacy, and help students critically analyze competing perspectives on poverty and inequality, in preparation for socially just social work practice.

Course goal: To enable students to critically examine the dimensions, causes, consequences and perpetuation of poverty and inequality in the U.S., to understand the role of policy in producing, maintaining, and alleviating poverty and inequality, and to offer a theoretical and analytic foundation for promoting social and economic justice.

Objectives: At the conclusion of this course, students will be able to:

1. Understand different measures of poverty and inequality, their value and empirical dimensions, and their consequences for the social construction of the problem, policy response, and the political debate.
2. Be familiar with the type, magnitude, and trends of disparities in several dimensions including power, status, health, as well as social and economic inequalities.
3. Understand stratification and inequality by various social dimensions such as race, ethnicity, class, gender, immigration status, disability, age, sexual orientation and family structure.
4. Understand the role of historical oppression in creating and perpetuating poverty and inequality.
5. Critically analyze competing perspectives on the causes of poverty, particularly individual versus structural explanations, how these theories are invoked in public discourse, and their implications for governmental response.
6. Critically evaluate and apply alternative perspectives on poverty and inequality, both within the US and global contexts, that encompass conflicts between labor and capital, synergistic processes of economic and social stratification, and other critical forces that produce and perpetuate poverty and inequality.
7. Understand the role of public policy and its implementation in producing, maintaining and alleviating poverty and inequality in the US.

Course Requirements and Grading Policy:

Readings: Our major texts are *Poverty in America* by John Iceland (2006, University of California Press) and *American Dream* by Jason DeParle (2004, Viking Press). *The Betrayal of Work* by Beth Shulman (2005, The New Press) is recommended as a complement to the DeParle book, but not required. Other readings are on electronic reserve with a one hard copy available at the SSW Library.

Written assignments: A series of written assignments will integrate class concepts and readings through analysis of a substantive area of student interests.

1. **Demographic briefing on poverty or inequality.** Students will complete a four page demographic briefing on economic (income or wealth) or social inequalities within or between demographically defined groups. Example: children and poverty; wealth among older women and men; income disparities and voter participation; or Latino families and health care access.
2. **Paper on competing perspectives and policies.** Building upon the first assignment (demographic briefing), students will critically analyze policy implications that derive from two competing theoretical perspectives on the cause of poverty or inequality.
3. **Final Paper.** For the final paper, students will revise and combine the first two parts and integrate class readings.

Written work should follow format guidelines on page 13 of the *SSW Guidelines for Student Papers*. Use a standard 12 point font (such as Times Roman or Arial, *not* Courier), double-space lines, and staple multiple-page assignments in the upper left-hand corner. Major assignments will be accompanied by assessment rubrics. Because of the time-frame of the course, the instructor may not have adequate time to comment on assignments turned in past the due date and students will not be able to reflect on comments. To motivate promptness, late assignments will automatically lose one point (1.0 on a 4.0 scale) per day.

Work submitted should be the student's original writing created in response to the assignment in question. Any suspected plagiarism will be investigated and referred to Student Services or the MSW program director. See <http://depts.washington.edu/grading/issue1/honesty.htm#plagiarism> for some useful rules as to what constitutes proper versus plagiaristic use of others' work. Confirmed plagiarism, even minor, will result in "no credit" for the assignment and may result in no credit for the course.

Mid-term evaluation: There will be a written mid-term quiz. This quiz will provide an opportunity for students to consolidate background knowledge before tackling the more conceptual issues in the second half of the course. Students will be encouraged to provide mid-term feedback to the instructor as well.

Participation: Course format will include lecture, class and small group discussion, and web-based communication. It is hoped that a tone of open discussion will be maintained throughout the course. We have much to learn from one another and this intellectual and personal growth is best achieved by encouraging dialogue and respecting diverse points of view.

In-class: Students are expected to attend class regularly, do the assigned reading in advance of class, and participate in class discussions and exercises. Participation and preparation are evaluated in class. If you must miss class, please notify Jen before class and negotiate a plan for making up your participation.

On-line: Students are expected to participate in an online discussion of course concepts and readings, including leading the discussion for one reading or set of readings. On-line participation can be completed via any networked computer including the SSW computer lab. The lab is staffed by a consultant, and additional help can be arranged by contacting sswtech@u.washington.edu or calling the lab at 206-685-2295. Find the discussion board at <https://catalysttools.washington.edu/gopost/board/romich/2514/>.

Grading: Numeric grades of 0-4.0 will be given according the following scale:

A/A-	4.0-3.5	Mastery of subject content, demonstration of critical analysis, creativity and/or complexity in completion of the assignment. The difference between an A and an A- is based on the degree to which these skills are demonstrated.
B+	3.4-3.1	Mastery of subject content beyond expected competency, but lacking in additional critical analysis, creativity, or complexity.
B	3.0-2.9	Mastery of subject content at level of expected competency; meets course expectations.
B-	2.8-2.7	Less than adequate competency, but demonstrates student learning and potential for mastery of subject content.
NC	2.6 or below	Significant areas need improvement to meet course expectations. Grades of 2.6 or below cannot be applied toward graduate degrees.

Assignments and activities are weighted as follows:

Participation (whole class, electronic and group)	35%
Mid-term quiz	15%*
Written assignments (demographic briefing, analysis of competing perspectives, and final paper)	50%*

*Students who feel that their midterm grade does not reflect their commitment to the course may make arrangements with me to weight the midterm and paper at 10% and 55% respectively.

Academic Accommodations: If you would like to request academic accommodations due to a disability, please contact Disability Resources for Students, 448 Schmitz, 206-543-8924/V, 206-543-8925/TTY. If you have a letter from the office of Disability Resources for Students indicating you have a disability that requires academic accommodations, please present the letter to me so we can discuss the accommodations you might need for this class.

Fall 2007 Preliminary Course Summary*

Date	Topic	Notes (assignments)
October 1	Introduction: Poverty and Inequality	
October 8	Poverty: Measurement and magnitude	Self-Sufficiency Standard (<u>prepare before class</u>)
October 15	Inequality: National and international measurement and implications	Take-home <u>midterm quiz</u> due Friday, October 19, 5:00 pm.
October 22	Theory: Why are some people poor? Why are there poor people?	<u>Paper part I due Friday, October 26, 4:30 pm</u>
October 29	American policies I: anti-poverty programs	<u>On-line midterm course evaluation (optional)</u> Midterm exams returned
November 5	American policies II: The less visible welfare state	Paper part I returned <u>Hard copy of paper part II outline / draft due in class</u>
November 12	Veteran's Day (no class meeting)	Self-scheduled paper peer review; <u>Paper part II due Friday, November 16, 4:30 pm.</u>
November 19	Local to global anti-poverty efforts	
November 26	Paper conferences (no class meeting)	Paper part II returned to mail file before scheduled conference.
December 3	Integration and wrap-up	Peer presentations (<u>prepare before class</u>)

*Specific readings, timing of topics, and assignment due dates are subject to change and adjustment as needed in order to help students meet course objectives. Expect updates throughout the quarter.

** Papers should be left in Romich's box in the faculty mail room. Early papers are always accepted.

Readings by week

Readings should be completed and contemplated before class. Please bring copies of the readings or detailed notes to class. Readings other than the Iceland, DeParle, Shulman texts are available via e-reserves at <https://eres.lib.washington.edu/eres/coursepass.aspx?cid=5273> .

Paper Assignments

Demographic Briefing (Part I) and Competing Perspectives (Part II)

Part I

This assignment provides an opportunity to understand the scope of poverty or inequality as applied to a population or topic of interest. Drawing on demographic data, students will write a brief report on one of two options.

Poverty option: Research and analyze income or wealth distribution within a population defined by age, gender, race, ethnicity, geography or a combination thereof. If useful, compare that economic distribution with that of a relevant comparison group.

Inequality option: Research and analyze a non-economic inequality such as educational attainment, health and longevity, political voice and power, criminal justice involvement, social mobility (the ability to climb the SES ladder), or sexual or reproductive sovereignty.

Papers should be four double-spaced pages and include the following elements,

- An introduction outlining the purpose and key points of the paper
- Definitions and operationalizations of important concepts
- Documentation of the scope and magnitude of the chosen economic or social inequality
- A discussion of relevant context

This is an exercise in interpreting and using demographic data. Support all statements of fact with references to academic, governmental or reputable non-governmental sources of information. Use language that clearly documents the situation without eliciting emotion or action. Let the facts speak for themselves.

Part II

Theories about why poverty or inequalities exist may draw on individual, social or structural arguments. Such explanations inform and justify policy responses. The second part of the paper is a critical analysis of policy implications that derive from two competing explanations on the cause of the economic or social inequality examined in Part I.

This paper should be four to six double-spaced pages and include the following elements,

- Identify two different explanations from course reading materials.
- Describe the logic and theory behind each explanation and explain how it applies to the situation described in Part I
- Describe policy responses that derive from each explanation. What policy goals would be implied by each perspective? How might these be achieved? (i.e., what types of benefits, services, conditions? Would these be entitlements? Criteria for eligibility? Etc.)
- Compare and contrast the two explanations and their associated policy responses from a social justice perspective.

Analysis drawn from external sources, readings for this course, and the Intellectual Foundations (Hub) course may be useful in developing this argument. Sources should be cited appropriately.

Final paper: Parts I and II will be revised, combined and extended to form the final paper. Details will be provided in class
